

VALORA
GRAND DOORS

VALORA THERM

Performance shaped for the Gulf

VALORA THERM

Performance shaped for the Gulf

Thermal separation

A low-conductivity barrier reduces direct heat transfer between internal and external aluminium sections.

Complete envelope

Profiles, insulated glass, perimeter seals, threshold and installation must perform as one assembly.

Climate-led specification

Orientation, shelter, solar exposure, wind and weather are reviewed before final selection.

Important

Project performance values require confirmation from the final approved system build-up.
